

WELCOME!

MV HAUS, MAGGIE VALLEY, NC

WELCOME TO THE SMOKY MOUNTAINS

WELCOME

Thanks for choosing to stay at MV Haus. We are so glad you have decided to book with us and we want to make sure you have a 5-star stay!

In this guide, you'll find lots of useful information that we've compiled over the years to help our guests make the most of their stay. From instructions on how to use the appliances to recommendations for nearby restaurants and shopping areas, we've got it all covered.

We hope that you enjoy the place as much as we did.

Have a great stay!

MEET YOUR HOST

Welcome to MV Haus! I'm Lucian, your host, and I'm delighted to introduce myself as the proud builder and caretaker of this cozy mountain retreat.

Having spent the past seven years on-site, I've had the privilege of getting involved with every detail of MV Haus's construction, ensuring that it embodies the perfect blend of comfort and modern eco-friendly design. With the help of my Dad and some skilled local craftsmen, we've created a space that I'm truly proud of.

As a nature enthusiast and an avid mountain biker and snowboarder, I've enjoyed every moment crafting this cabin and its surroundings, all while cherishing the serenity of the Great Smoky Mountains.

If you have any questions or need recommendations for local attractions, outdoor adventures, or simply want to learn more about the story of MV Haus, please don't hesitate to reach out. I'm here to make your stay as enjoyable and memorable as possible.

Thank you for choosing MV Haus for your getaway, and I can't wait to share the beauty and tranquility of Maggie Valley, NC, with you.

Warm regards, Lucian

We have a few rules which I'd like to let you know about. We know rules are boring, but we'd really appreciate if you could have a quick read.

01

No parties or events allowed (unless approved by host)

02

No smoking of any kind allowed inside the house

03

No pets allowed (unless approved by host)

04

No unregistered guests allowed on the property

05

Quiet hours outside after 10pm

WIFI PASSWORD

NETWORK

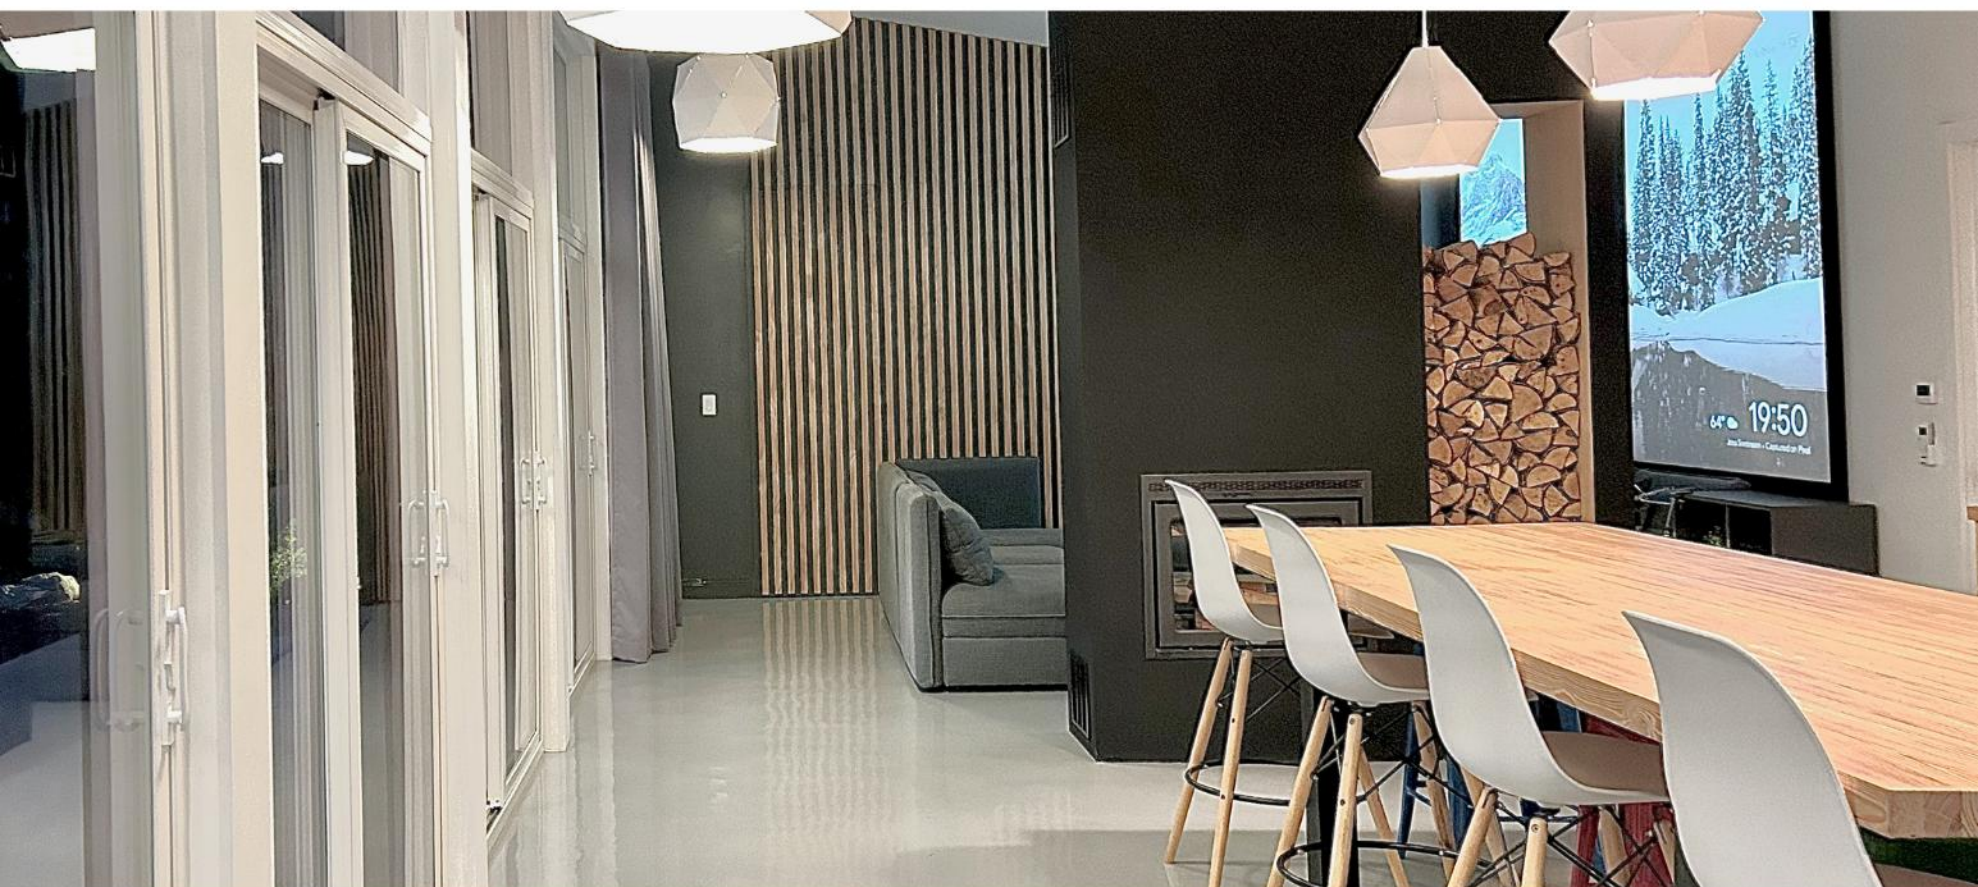

MYSPECTRUM-5G

PASSWORD

smileycanoe494

CHECKOUT

- Checkout is 10:00_{AM} and the Cleaning Crew will arrive at 10:00_{AM} to begin preparing the house for the next guests.
- Please clean used dishes.
- Leave all towels on the floor and all sheets on the beds.
- Replace any moved furniture.
- Please sign the guestbook and notify us when you leave!
- Come back and see us!

HOUSE GUIDE

Below are a few helpful tips on how to make your stay more comfortable and enjoyable.

Heating

Radiant Heating System

At MV Haus, we take your comfort seriously, and our radiant heating system is designed to ensure a cozy and pleasant stay. The cabin features three separate heating zones, each equipped with its own thermostat for individual climate control:

- **Zone 1:** This zone covers the master bedroom and master bath, allowing you to tailor the temperature to your exact preference for a restful night's sleep.
- **Zone 2:** In the living room, kitchen, dining room, and the second bathroom, you have complete control over the temperature, ensuring a warm and inviting atmosphere for relaxation and dining.
- **Zone 3:** The two additional bedrooms are part of this zone, where you can set the temperature to your liking, ensuring everyone's comfort.

Radiant heating, which involves warming the floors to provide consistent and efficient warmth, not only enhances your comfort but also complements our eco-friendly design. Please feel free to adjust the thermostats to create the perfect ambiance during your stay and return to 69°F upon departure. If you have any questions or need assistance with the heating system, don't hesitate to reach out to us. Enjoy the warmth and comfort of MV Haus!

HOUSE GUIDE

Indoor Fireplace

DUET

SUPREME FIREPLACES

2. OPERATING INSTRUCTIONS

WARNING: READ THE OWNER'S MANUAL CAREFULLY. Read the following brief instructions before using your fireplace.

The Duet is not intended to serve as a primary source of heat. A primary source of heat must be available in the home that the Duet is installed in. Supreme is not responsible for heating costs related to other sources of heat.

2.1 Fuel

The Duet is designed to burn dry, natural, seasoned wood having a moisture content below 20%. The optimum log length is 16-18 inches, preferably split in halves or quarters and left to dry under a cover or away from the elements for a minimum of one year prior to use.

Use good quality dry cordwood only. DO NOT burn coal, construction lumber, twigs, sawdust, plastic, garbage or other foreign materials in your fireplace. Gas logs cannot be used with the Duet. Use solid wood fuel only. Do not burn paper, newspaper, cardboard, pine tree branches or construction materials.

Do not over fire the Duet. Over firing will damage the fireplace, is hazardous and will void the warranty.

WARNING: Never use gasoline, gasoline-type lantern fuel, kerosene, charcoal lighter fluid, or similar liquids to start or "freshen up" a fire in this fireplace. Keep all such liquids well away from the fireplace while it is in use.

Ecological or compressed logs containing chemical additives are not tested and approved to be used with the Duet. Using them will overheat and damage the fireplace and void the warranty. Ecological or compressed logs that are 100% wood and contain no other additives can be safely used in the Duet. Never use more than three of these logs at a time. Using more is not only dangerous, but will damage the fireplace and void the warranty. Follow the ecological log manufacturer's safety guidelines and recommendations and be sure that they are intended for use in fireplaces. Reload only once the previous load of wood has been consumed and only a small flame remains.

WARNING: Do not keep the door open while the fireplace is lit.

2.2 First Fires

Due to oil residues and the curing of the paint of the fireplace, an odor can be smelled during the first 2 to 3 fires of the Duet. Open a window or a door near the fireplace to ventilate the house during the first fire.

2.3 The Combustion Air Control

The burn rate and the heat output are related to the amount of combustion air. The combustion air control of the Duet has two components: the Easy-Light and the Burn Rate Selector (see figure 1).

2.3.1 Operating the Combustion Air Control

When starting the fire or when adding a new charge of wood, the fireplace needs additional air in order to establish a good fire. When the wood starts to burn properly, the amount of air can be reduced depending on the heating requirements.

The left combustion control lever is the Easy-Light mechanism

(see figure 1). When starting a fire or adding a new load of wood, the Easy-Light must be pushed in to allow a primary source of air to enter the firebox.

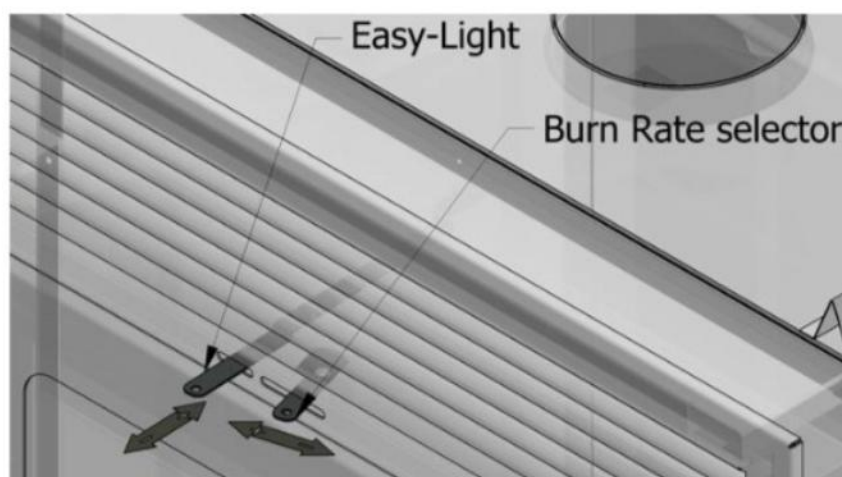

Figure 1 - Combustion Air Control

The right combustion control lever is the Burn Rate Selector (see figure 1). The Burn Rate Selector can slide sideways to achieve different burn rates. When the Burn Rate Selector is positioned to the left, a maximum burn rate is achieved and when it is positioned to the right, a minimum burn rate is set.

Keeping the Burn Rate Selector to the right will burn the wood slower. Keeping the Burn Rate Selector to the left will provide a stronger fire and keep the glass of the fireplace cleaner for longer. Adjust the burn rate according to your heating requirements and the quality of your wood.

The combustion air control will automatically and gradually close the primary air source with the presence of heat to maximize the burn time.

WARNING: The combustion air openings should never be obstructed.

2.4 Starting a Fire

Assure that all the safety precautions mentioned in the owner's manual are being respected.

1. Place two logs in the firebox. The logs should sit directly on the hearth. Maintain approximately a one inch gap between the logs. This will facilitate the Easy-Light airflow. Do not use a fireplace grate.
2. Add a firestarter on top of the two logs.
3. Add two more logs on top of firestarter and first set of logs. A log should be positioned directly above the firestarter, but with a one to two inch gap (see figure 3).
4. Push the left combustion control lever (the Easy-Light) inwards.
5. Slide the right combustion control lever (the Burn Rate Selector) to the desired burn rate. Positioning the Burn Rate Selector towards the left is for maximum burn rate and towards the right is for minimum burn rate.
6. Light the firestarter.
7. Once the firestarter is well lit, close the door. Do not leave the door open for more than 2 minutes.

Caution: The wood should be placed away from the doors to avoid damage to the glass.

WARNINGS: Overfiring the unit may result in overheating and can damage the fireplace and/or result in fire hazards. The maximum firewood load must not exceed 4 medium sized logs (approximately 30 pounds). Open the door to reload only when the wood has been reduced to charcoal, otherwise there is a risk of smoke infiltration into the house.

This fireplace has been designed to burn with the doors closed. When the fireplace is being used, the doors should remain closed at all times. Failing to do so is a safety hazard, will damage the fireplace and void the warranty.

NOTE: Always place the wood at the center of the firebox. Keep the bottom logs apart in such a way that at least one slot of the ashtray grate is not obstructed. The Easy-Light air flows through the grate slots.

WARNING: Do not use fire accelerants to rekindle the fire if the first attempt to start the fire failed. Do not open the door. Simply reactivate the Easy-Light by pushing it inwards.

NOTE: Sufficient air exchange is necessary for the fireplace to operate properly. Air is required in order to maintain the combustion of the fireplace. If the house is airtight, the fireplace may not function properly. If the fireplace is deprived of air, it will be necessary to provide a source of fresh air into the dwelling. This may be done by using an air exchanger unit or simply by opening a window or a door near the fireplace partially for a few minutes. Make sure that other equipment such as the kitchen exhaust fans or oil central heating systems do not affect the fireplace functionality. Large return ducts of central heating systems located in the same room as the fireplace is installed may affect the proper functioning of the fireplace and may cause smoking.

Figure 2 – Not Recommended

Figure 3 - Recommended

2.5 Adding a New Load of Wood

When the wood has been reduced to embers, add a new load.

1. Open the fireplace door and use your fireplace tools to gather the remaining embers at the center of the firebox.
2. Close the door and activate the Easy-Light. Wait 2-3 minutes for the embers to be activated.
3. Open the fireplace door slowly and add 2-3 logs. Space the bottom logs 1-2 inches apart to allow the flame to move upwards.
4. Close the fireplace door.

Note: It is important to assure that a flame is maintained. If the flame is not maintained, reactivate the Easy-Light.

2.6 Smoking

Fireplace smoking can occur for a number of reasons: a negative pressure in your home, simultaneous use of other fans (such as a kitchen exhaust fan), wood having a high moisture content, a chimney that is below 15 feet long, a dirty chimney. Before starting a fire, if you feel a cold draft in the firebox (called a downdraft) you will likely experience smoking. Have your chimney swept at least once a year and inspected at least twice a year.

If you experience a downdraft, follow the following procedure to light the fireplace:

1. Load the fireplace as described in section 2.4.
2. Activate the Easy-Light by pushing it inward.
3. Place 3 sheets of crumpled newspaper on top of the wood.
4. Open a door or a window near the fireplace.
5. Open the fireplace door and ignite the firestarter. Ignite the newspaper in several locations. Keep the fireplace door fully opened. A small amount of smoke will leak in to the house. The intense flame of the newspaper should reverse the draft and a fire will start.
6. Close the fireplace door.
7. Close the door or window near the fireplace.

Entertainment

At MV Haus, we've taken care to ensure you have an array of entertainment options during your stay. Each of the three bedrooms is equipped with a Smart TV, allowing you to access your favorite streaming services and content by logging in with your own credentials.

In the living room, we've gone the extra mile to provide you with a cinematic experience. A projector and a 15-foot movie screen await your movie nights. To use it, simply select either HDMI 1 for Google Chromecast, enabling you to cast content from your phone or compatible device, or HDMI 2 for Roku. For an immersive audio experience, connect to the Yamaha receiver located on the bookshelves in the dining area via Bluetooth. The receiver typically connects automatically, but if needed, a button beneath the projector can assist with the pairing.

To further enhance your entertainment, we've divided the sound into two zones: Zone A covers the living room, while Zone B caters to the dining area. We hope this helps you make the most of the entertainment options in the cabin.

If you encounter any issues please don't hesitate to contact us at (678) 230-3054 and we'll be happy to assist.

The background image shows a bright, modern interior space, likely a dining or kitchen area. It features a long wooden table, several colorful bar stools (red, blue, yellow), and several geometric, faceted pendant lights hanging from the ceiling. Large windows in the background offer a view of a lush green landscape and a blue sky with clouds.

HOUSE GUIDE

Trash

We have provided extra trash bags under the kitchen sink. Please deposit all full bags to the rolling trash can located behind the house.

Kitchen

Feel free to use anything in our fully stocked kitchen. If there is a common item missing please let us know asap and we will have it replaced during your visit.

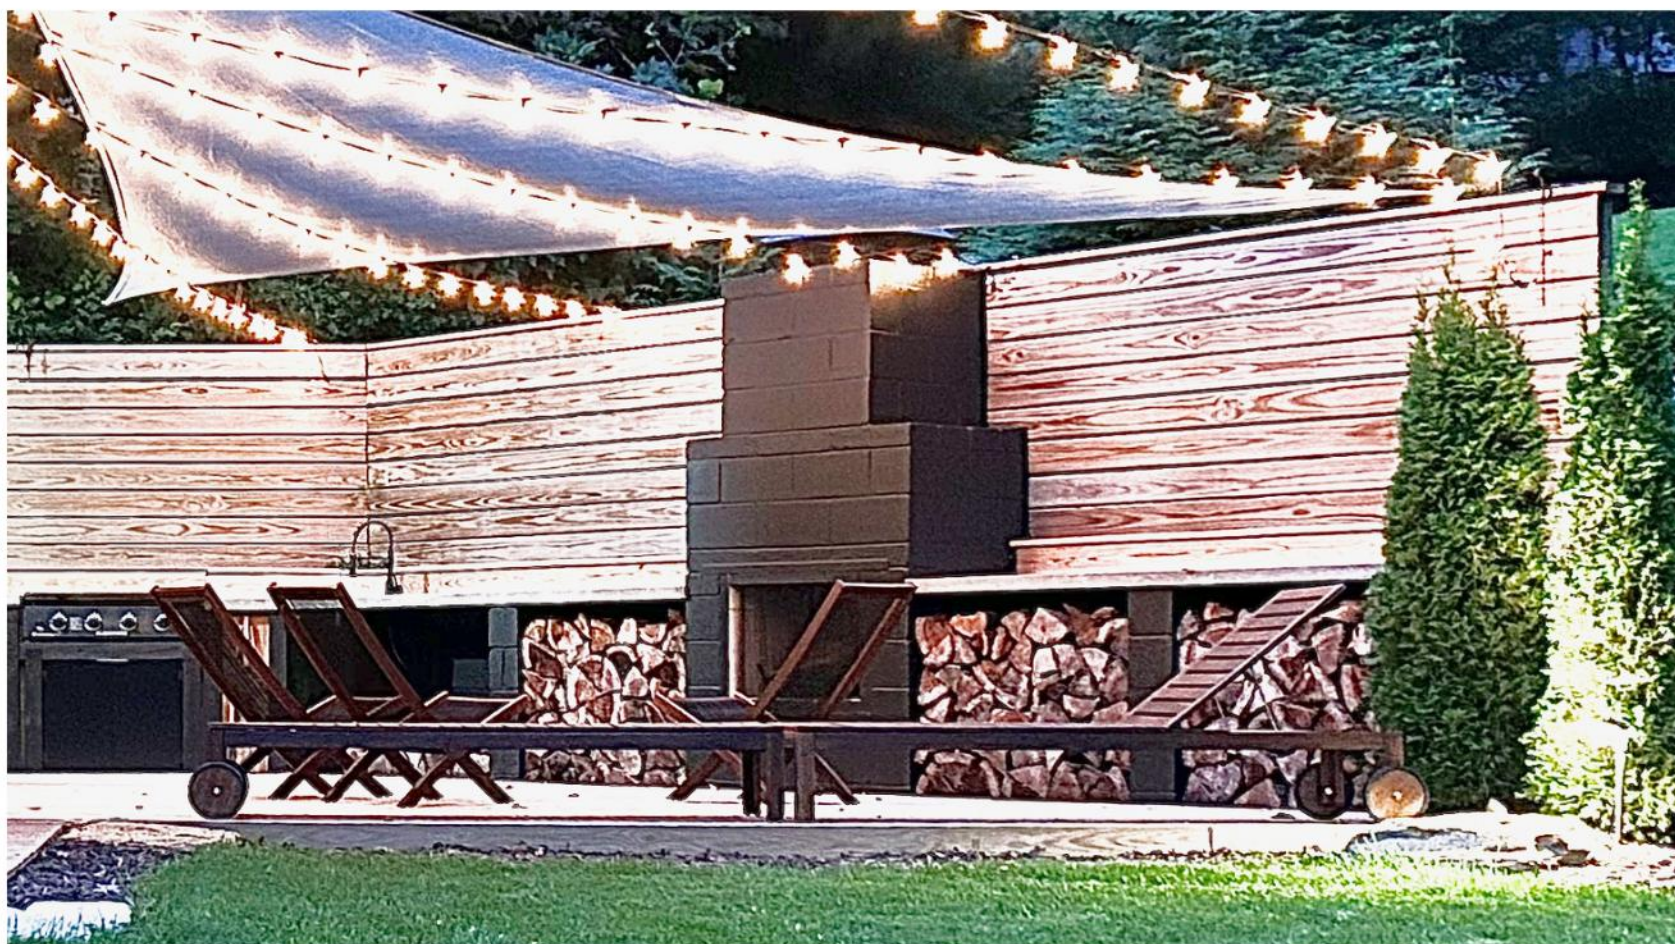

Washer and Dryer

The washer and dryer are located in the utility room. Please contact your host for access if needed

Parking

There is ample parking available on site.

Outdoor Kitchen and Firepit

Step into the outdoor kitchen area at MV Haus, a delightful al fresco escape that promises to elevate your dining and relaxation experiences.

At the heart of this space, you'll find a 36" Blackstone gas griddle, perfect for whipping up delicious meals with your loved ones. Whether you're sizzling up a hearty breakfast or grilling savory dinner favorites, this versatile appliance is sure to become your culinary playground.

For added convenience, we've included a sink, ensuring that meal preparation and cleanup are a breeze. A well-appointed breakfast area with ample seating awaits, providing a cozy spot to enjoy your creations while immersed in the beauty of the outdoors.

As the sun begins to set, gather around the outdoor fireplace and let its warmth and ambiance create the perfect backdrop for memorable evenings. The charming string lights overhead and the strategically placed shade sail add a touch of magic to your outdoor gatherings.

Whether it's a leisurely breakfast, a hearty dinner, or simply enjoying a drink by the fire, our outdoor kitchen area is the ideal setting to relish the fresh mountain air and create unforgettable moments during your stay at MV Haus.

LOCAL MUST-SEES

Just a short drive from MV Haus, the **Wheels Through Time Museum** is a hidden gem that's a must-visit for motorcycle enthusiasts and history buffs alike. This living museum showcases an incredible collection of rare and vintage American motorcycles, dating back to the early 20th century.

Explore the evolution of motorcycling through a stunning array of beautifully restored bikes, including Harley-Davidson, Indian, and more. The museum is not just a display; it's an experience where you can witness these historical machines in action, as many of them are fully operational and regularly taken for a spin.

Engage with passionate staff members who are more than willing to share their knowledge and stories about the bikes. The museum's commitment to preserving the heritage of American motorcycling is truly remarkable.

Whether you're a motorcycle enthusiast or simply curious about the history of these iconic machines, a visit to Wheels Through Time is an unforgettable journey back in time. It's a testament to the ingenuity and craftsmanship of the past, and it's right in your backyard during your stay at MV Haus. Don't miss this one-of-a-kind experience!

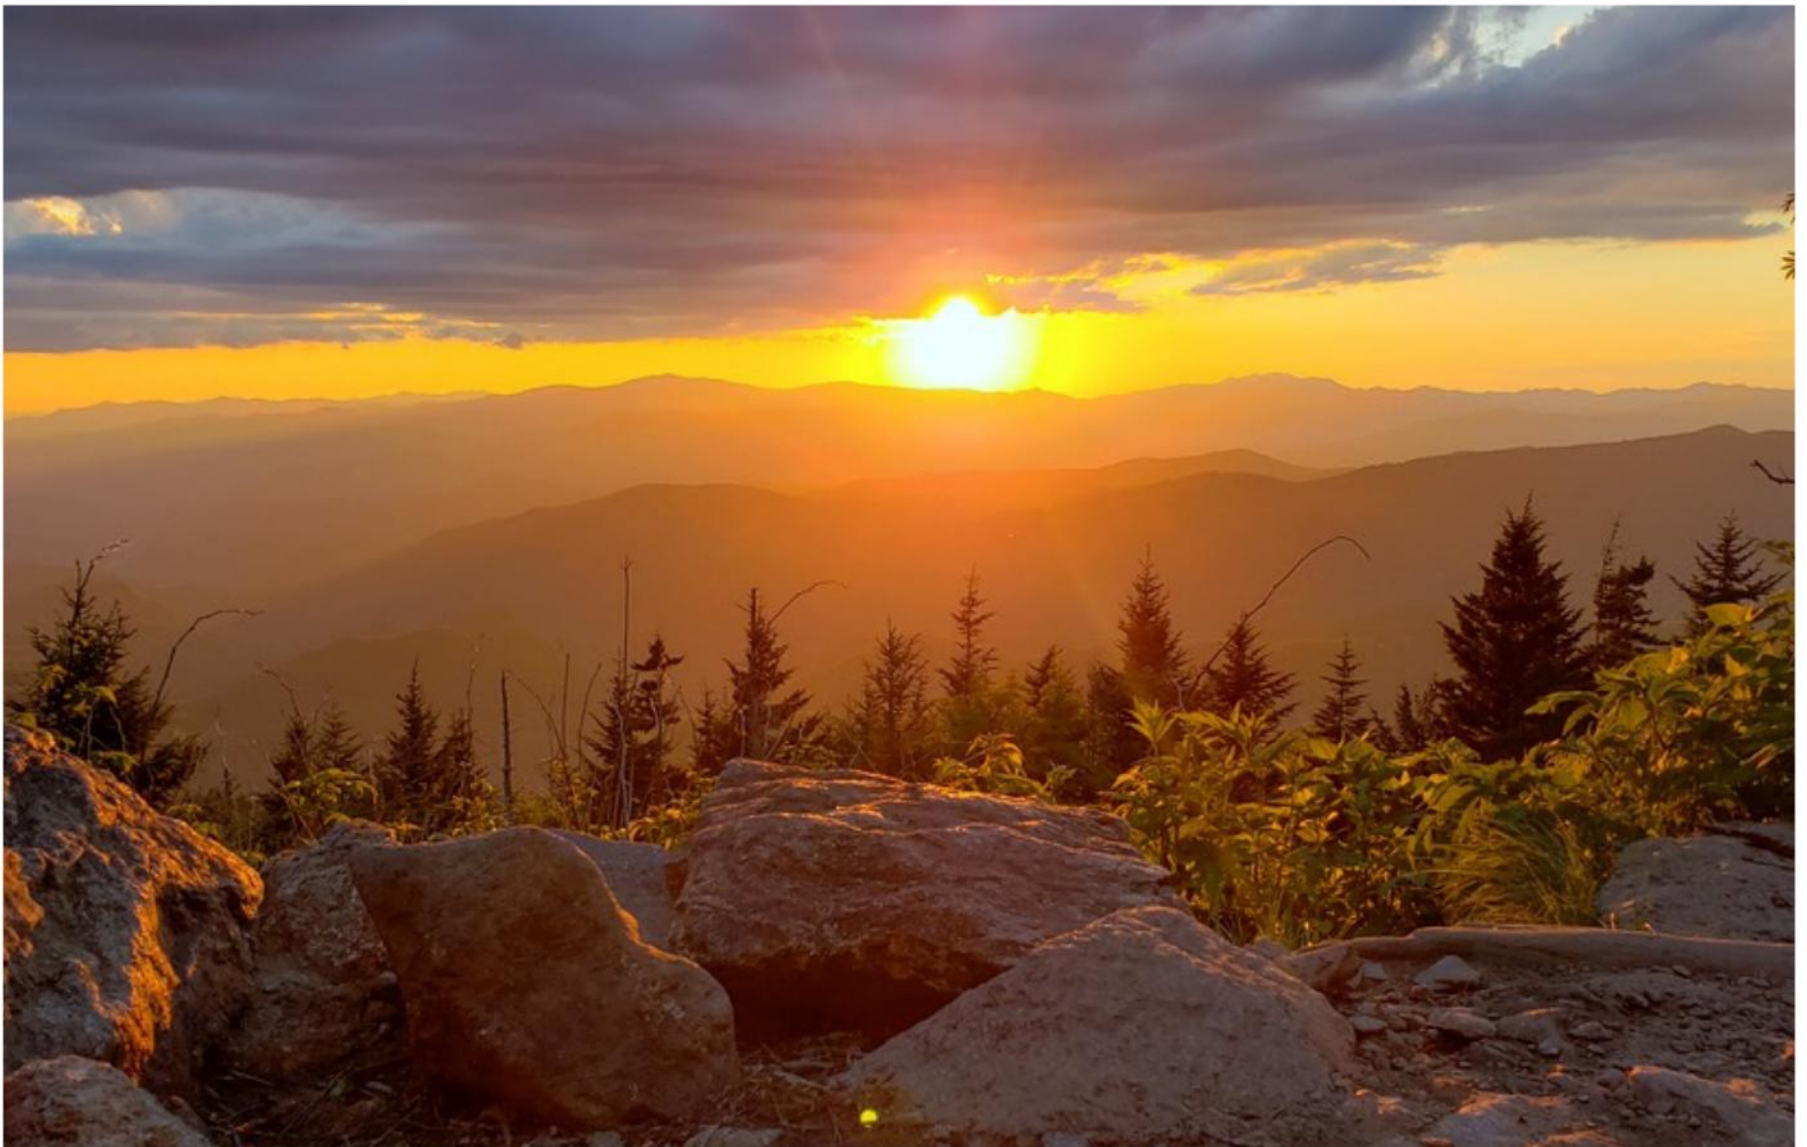

62 Vintage Ln, Maggie Valley, NC 28751

LOCAL MUST-SEES

Waterrock Knob - Where the Sky Meets the Earth

Located just a short drive from your MV Haus cabin, this must-see attraction promises an unforgettable mountain experience. It's a photographer's dream and an ideal spot for capturing memories that will last a lifetime.

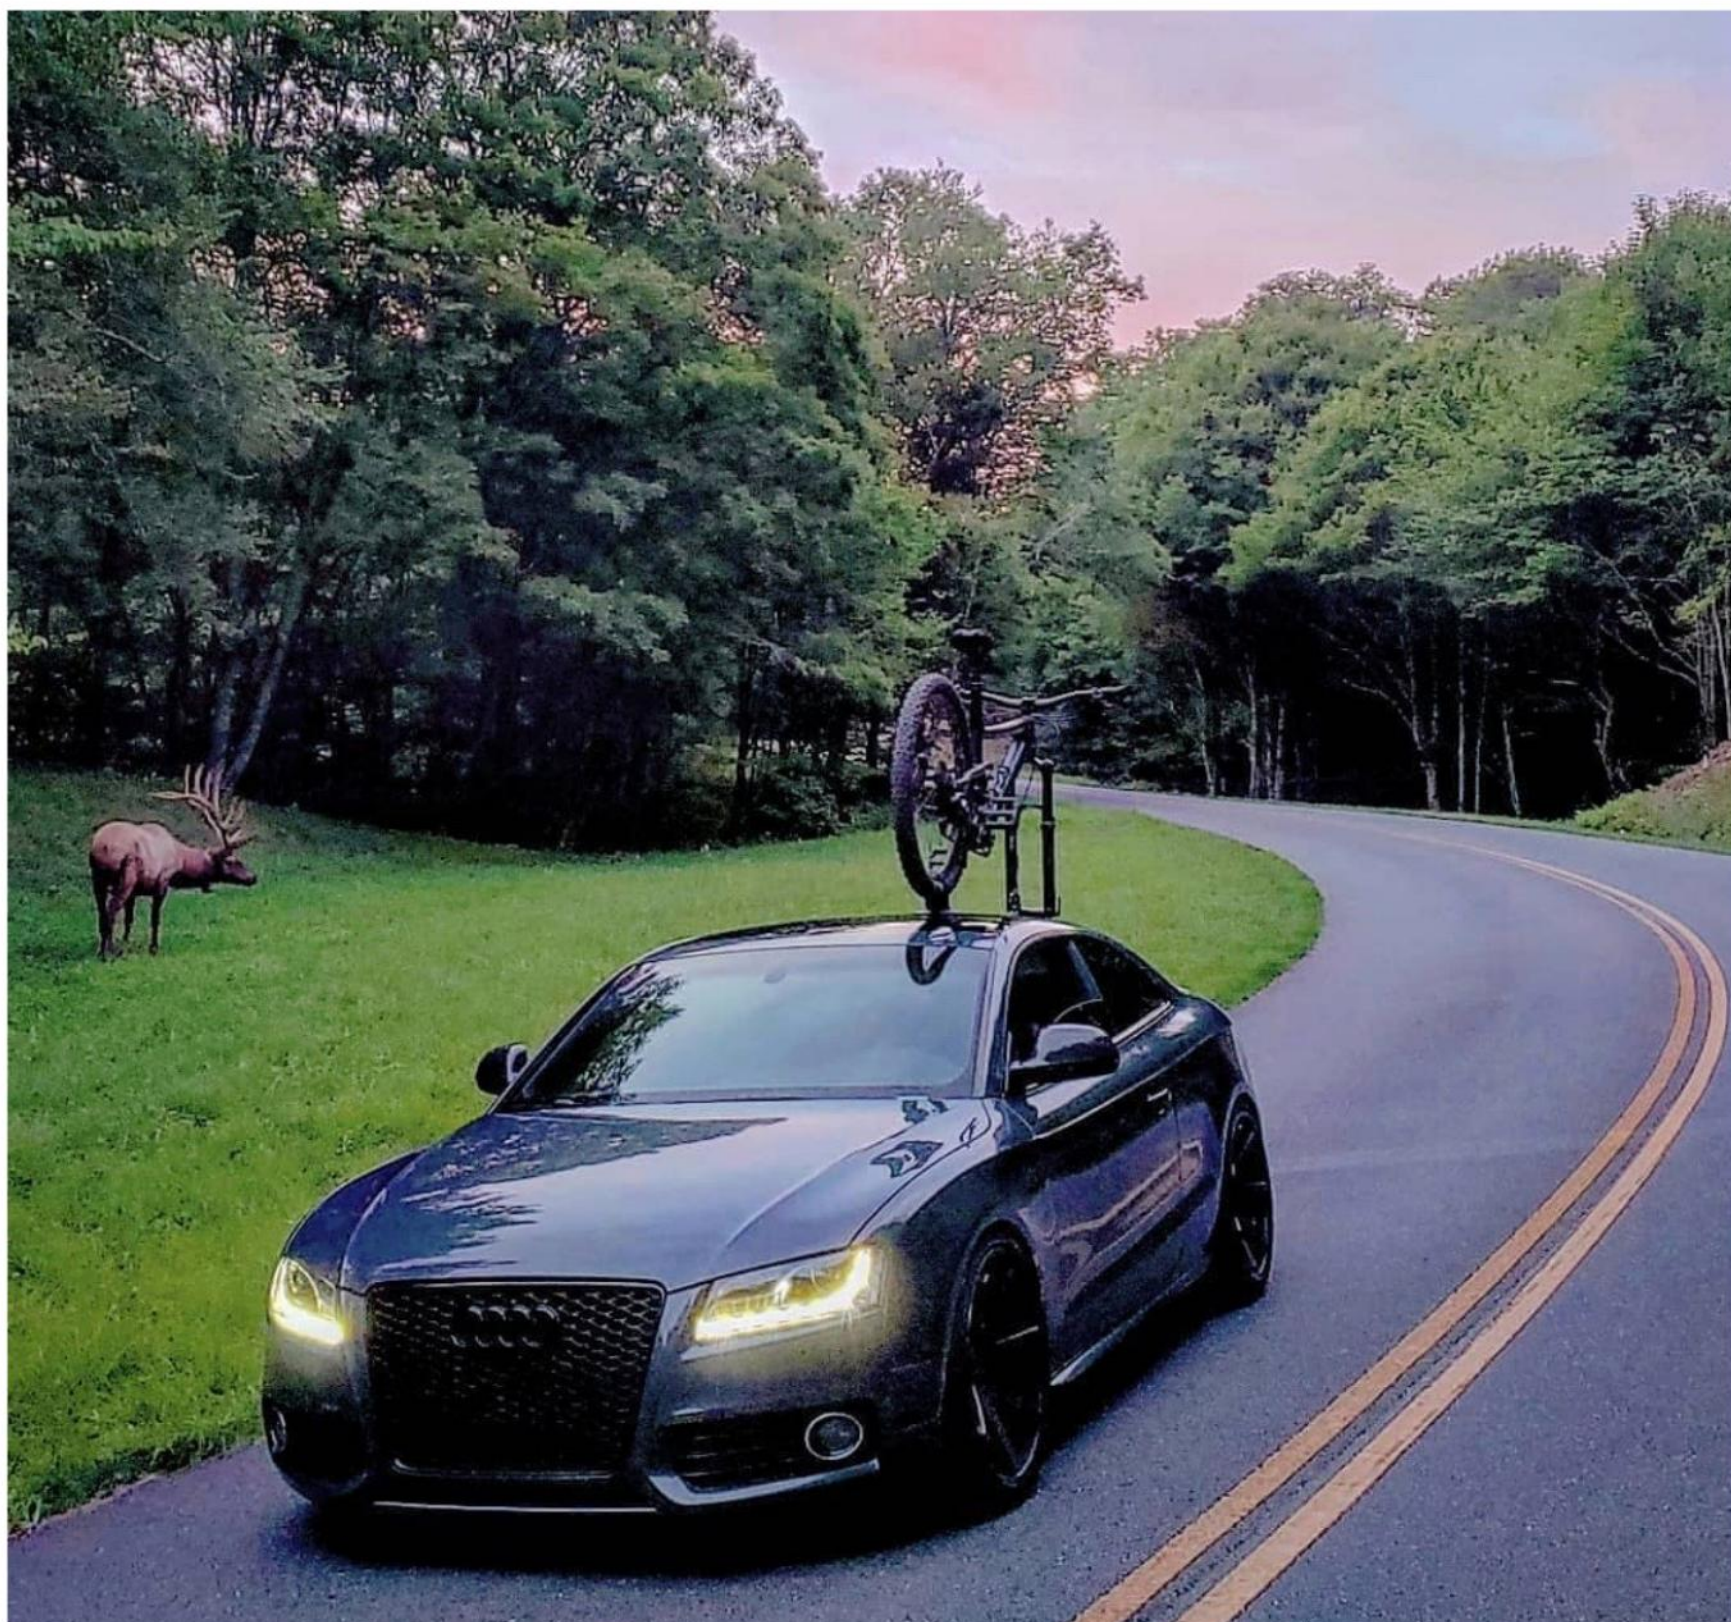

Sunsets to Remember: Be sure to visit during the golden hours, particularly at sunset, when the sky is painted with brilliant hues. As the sun dips below the horizon, casting a warm, fiery glow over the peaks, you'll witness a spectacular show that's nothing short of magical.

LOCAL MUST-SEES

Blue Ridge Parkway

Embark on one of America's most scenic drives along the Blue Ridge Parkway. Take in awe-inspiring mountain vistas, lush forests, and vibrant foliage in the fall.

LOCAL MUST-SEES

Great Smoky Mountains National Park

Just a stone's throw away from MV Haus, the Great Smoky Mountains National Park beckons with its boundless natural beauty and endless possibilities for exploration.

This renowned park, known as the "Smokies," is a true treasure trove for nature enthusiasts.

Hiking Trails: Lace up your hiking boots and immerse yourself in a network of trails that wind through lush forests, meander along pristine streams, and lead to awe-inspiring vistas. From easy, family-friendly strolls to challenging backcountry adventures, there's a trail suited to every level of hiker.

Scenic Drives: If you prefer to take in the scenery from the comfort of your vehicle, the Smokies offer a multitude of picturesque drives. Traverse winding mountain roads and be captivated by the ever-changing landscape, from serene valleys to towering peaks.

Diverse Wildlife: The Great Smoky Mountains are alive with wildlife. Keep your eyes peeled for deer, black bears, and a variety of bird species. It's a naturalist's paradise, and you might even spot an elk in the Cataloochee Valley.

LOCAL MUST-SEES

Cataloochee Valley

A hidden gem within the national park, Cataloochee Valley is known for its historic buildings, wild elk population, and picturesque landscapes. A visit here is like stepping back in time.

testimonial

Julie
October 2023

Everything about our stay was lovely! The house is absolutely incredible with amazing views of the mountains. Super clean and comfy. Probably my favorite Airbnb that I've ever stayed at just based on the vibes of the house. 10/10.

testimonial

Susannah
October 2023

My experience staying here was INCREDIBLE! Amazing views. You feel like you are living outside, surrounded by mountains and stars, but with all the comforts of being inside--my dream come true! Every single aspect of this home, inside and out, has been thoughtfully designed for guest comfort and the perfect experience. We loved all of the landscaping, the evening lights around the home, exterior fireplace, decks and seating. The interior was spotlessly clean and had absolutely everything we needed for the most perfect stay in Maggie Valley. The house is also just a couple of minutes from the main strip even though it feels completely secluded and private. Lucian is one of the best hosts I've encountered. He cares a lot and is a joy to work with. Highly recommend!
