

Professional Gardening & Pool Services During Your Stay

Depending on the day(s) of the week that your stay occurs, we want you to know that professional service teams may be at the property (exterior only). Just like a hotel or resort, these services are necessary at a vacation rental, too. In fact, as a registered vacation rental, the services are required by City ordinance.

Pool and landscaping service are very commonplace in Palm Springs. The service workers visit dozens of properties per day, and up to a hundred per week. The workers will self-enter the back yard of the property using their own secure gate code. As a courtesy, the personnel are professionally trained to politely keep to themselves. However, of course, you are welcome to say hello if desired!

The swimming pool and spa are professionally cleaned twice per week. The service person will self-enter through the back gate using their own secure electronic code. During the visit, the pool technician will test the water chemistry, skim leaves, scrub the tile and use an underwater vacuum. The duration of the cleaning is typically 10-15 minutes. The current scheduled cleaning days of the week are posted at the house inside the pantry door and in the guest guide at the house.

Yard maintenance is scheduled once per week. The service entails lawn mowing, leaf blowing, and light pruning, etc. Annual palm tree pruning may also take place. The yard service personnel will self-enter through the back gate using their own secure electronic code. The duration of the visit is approximately 20-30 minutes. The current scheduled service day is posted at the house inside the pantry door and in the guest guide at the house.
